[Unit: Health and Well-being, Nursing](#)

### Partners

National social and health care organisations and organisations of higher education, such as:

- The Hospital District of Southwest Finland
- The Welfare Division of Turku City
- University of Turku
- University of Oulu
- University of Eastern Finland
- University of Helsinki
- University of Tampere
- Universities of Applied Sciences in Finland
- University of Malta
- Coventry University
- Cardiff University
- Middlesex University
- Dublin University
- Oslo Arhus University
- Molina University
- Riga Medical College of the University of Latvia
- The Swedish Red Cross University College
- Kauno University of Applied Sciences
- P.Stradins Medical College of the University of Latvia

## **Clinical expertise in Health Care**

In the core of the research group is the innovative development of clinical expertise in health care. We focus on the areas of clinical expertise from the perspectives of emergency care, midwifery and nursing, following the needs of society and the world.

Our research group aims to carry out applied research. Our project activities are based on versatile expertise in developing different educational interventions and training programmes, research evaluation, using different research methods, and simulation pedagogy.

In our projects, we conduct multidisciplinary collaboration with different actors both regionally, nationally and internationally.

### **Focus areas**

The most central development areas and interests of our research group:

1. Ethics in health care
2. Medication expertise and medication teaching
3. Cancer care
4. Intensive care expertise
5. Issues related to the social welfare and health care reform
6. Clinical training in health care and nursing education
7. Simulation expertise / Simulation pedagogy / supporting clinical expertise through simulation pedagogy
8. Games in health care education
9. Digitalization in health care

### **Ongoing projects**
