

Developing of the School Health Care

The School Health Care continuing education course

The School Health Care continuing education course provides an extensive basis for evidence based development of school health care services.

Our education is based on the good practices of the Finnish school health care system which **focuses on:**

- prevention of health risks
- health promotion
- preventive and curative health care services
- multi-professional collaboration.

School nurses are the main professionals working within school health care.

Target group

The School Health Care continuing education is directed at nurses and organisations in the fields of health care and education.

- After this education, participants are able to plan and put school health care nursing into operation in their own organisation.
- Our education is based on the good practices of the Finnish publicly funded school health care system in which **the role of the school health nurse** is extremely central.

Training modules

The school health care system

- A health promoting school environment
- Transferring the benefits – implementation of the good Finnish practices in the target organisation.

Multiprofessionality in school health care

- The roles of different actors in the multiprofessional school health care team
- The multiprofessional school health care team and its impact on the health and well-being of the pupils.

Professional competences of the school nurse

- Evidence based school nursing care
- Basis for practising school nursing
