## **SimE - Project Simulation pedagogy in learning ethics in practice in health care**

### **The project SimE aims to:**

Increase ethical competence among nursing students in the Central Baltic region.

Provide a safe and effective learning environment for nursing students to practice complex ethical skills through simulation and practical training. Prepare professionals to possess an equal and ethical capability within our health-care systems in the Central Baltic region.

### **The project SimE will result in:**

Three joint study modules:

Course 1 Basic Theories of Ethics (2ECTS)

Course 2 Ethical Coffee Room (1 ECTS)

Course 3 Simulation in Ethics (3 ECTS)
