Technical inspection of vehicles

The periodical technical inspection, enforced by legislation, ensures the road safety as well as regulation and emission compliance of the vehicle.

The technical inspection services, offered by Turku University of Applied Sciences, are available for everyone at a customer friendly cost. We provide all regular inspections and registration services for both light and heavy duty vehicles, but no insurances. We emphasize on educational approach and personalized service.

Our services are offered in two convenient locations in Turku. The light duty vehicles are inspected in the Automotive Laboratory of the Sepänkatu campus. The heavy duty vehicles and trailers are inspected in our collaboration partner's (K1) station in the following address: Rieskalähteentie 76.

The services are available all year around, light duty vehicles mainly on Mondays and Fridays, other vehicles also on other days by appointment. Please, book your time beforehand in every case.
